Dear Ms. Seppi,
Receipt is acknowledged.
It seems then based on a perceived lack of health risk data, those residents enjoyed a financially supported move.
We are in possession of an additional, recent study by a nationally recognized university on health effects; I have permission to share with you. I may also post it as a public comment (depending on Chief Mann's directives.)
I need to confer with Chief Mann briefly prior to its transmission.
Judy Sullivan

Good Afternoon Ms. Sullivan and Dr. Edelstein,

I am responding to your emails sent to me and the R2 Regional Administrator Pete Lopez on April 13, 2020. We appreciate your continued interest in the Ringwood Mines Superfund Site. Our Ringwood team has been working to do our best to address your concerns regarding the relocation of the residents at the Arsenic Mine Superfund site in Kent, NY and the reasons we have not considered permanent relocation at the Ringwood Mines site. I know we have spoken about this in the past and I hope this further explanation will be helpful. Please feel free to reach out to me if you would like to schedule a call to discuss this further and answer any additional questions and concerns you may have.

The first attachment is the original request that I received from both you, Ms. Sullivan and also Dr. Edelstein. The second attachment is the final response from EPA.

Thank you,

Pat Seppi
